....There is a hearing Tuesday HB 5263, a bill to POSSIBLY allow the processing of thousands of rabbits for food consumption. Essentially this Department of Agriculture's proposal will bring factory-like farming of rabbits to CT under the guise of promoting farming in the state.

VOTE NO on HB5263;

RABBITS are one of God's loving creatures

1- Rabbits are the third most common household pet after dogs and cats

2- Due to public pressure, Petco and PetSmart stopped selling pet rabbits.

They now only display ***rescue ***rabbits for adoption – the same treatment they give to dogs and cats.

3-Whole Foods and other specialty stores stopped selling rabbit meat after concluding there was no market for sales.

4-The multi-billion-dollar cosmetic industry has been moving **away from using rabbits and other animals in their testing programs due to consumer pressure.

5-While the rest of the country has recognized and elevated rabbits as pets, CT is taking a step backward in proposing this initiative.

WE MUST PROTECT ALL GODS CREATURES FROM TORTURE & MURDER.
AMEN.
